RAE PORTABLE INSTRUMENT TECHNICIAN

This certified Honeywell course delivers advanced instruction for hazmat professionals in the maintenance and operational theory of Honeywell Portable Air Monitoring devices. Core content includes manipulative methodologies, detector theory, sensor technology, system configuration, calibration procedures, and full maintenance workflows. Instrument coverage spans the MultiRAE series, AreaRAE, QRAE 3, MiniRAE 3000, ppbRAE 3000, ToxiRAE Pro, and Safety Suite. The course also features a specialized module on wireless configuration and application.
